I want to first thank the Leadership Council for all the time, effort, and dedication you are putting into making Green Bay a better place! I also want to apologize as I will only be able to provide this statement, and not answer all the questions per item.

I will most certainly keep Kids Day as I know how much people/children really enjoy it. I have enjoyed taking my nieces to the different events/activities around Green Bay. It's awesome!

Not sure of what my theme song is...but my favorite singer is Elvis Presley, so it would most likely be something from him. For some of you who know me, you'll get a chuckle when I say that I do like "I did it my way." But don't we all.

I very much appreciate the work our Neighborhood Associations are doing. I was quite involved with Perkins Park until it basically fell apart. And that is an unfortunate example of politics within an organization. I'm sure you have all experienced it within your Association. That is why if we are going to have the survival and expansion of Association's we need a dedicated City employee working with the Leadership Council. It only makes sense.

You can view The Evans Plan on EvansForMayor.org as it will outline most of the questions you ask about infrastructure and economic development.

Speeding is a constant complaint, as I receive numerous calls about (as Supervisor). I have found working with the Green Bay Community Police Division that we can get officers performing speed enforcement in a timely fashion. I don't see people driving slower in the future, but I do know enforcement helps. Thus, we need to have a solid plan in place and means of communication to make sure the city is providing this enforcement in an acceptable manner that the leaders of the Associations would like to see.

Finally, I look forward to being involved with the Neighborhood Associations as Mayor. I know the great work that is being done to improve our city from within, and the Neighborhood Associations should receive a great deal of credit for that.

Thank you for all you do for Green Bay!
Pat
